Energy Management Policy

As Enerjisa Enerji A.Ş., we aim to manage energy consumption with a systematic approach in all our activities, to ensure efficient use of resources and, accordingly, to reduce energy costs. For this aspect, we aim to establish, implement and maintain an energy management system that aims to improve energy performance and efficiency continuously.

In order to achieve these goals and objectives, Enerjisa Enerji A.Ş. undertakes an effective, inclusive, realistic and integrated energy management approach in line with the following principles:

- We fulfill our obligations arising from all legal requirements and contracts,
- We aim to set measurable targets that will increase energy efficiency in our activities, to monitor targets periodically and to improve energy performance continuously,
- We periodically report our continuously monitored energy performance and share it with internal and external stakeholders,
- We observe energy efficiency in product, design and service purchases,
- We ensure that the resources and information required for the fulfillment of all these goals and objectives are available and accessible,
- We regularly review our energy management policy and update it when necessary in consideration of technological or sectoral developments.
