During the period of 01.01.2026 - 30.09.2026 TL 209,079,365 was spent on the projects supported by EU Framework Programs, TÜBİTAK and EMRA R&D funds.

COMPANY'S OPERATIONS AND RELATED MAJOR DEVELOPMENTS

a) Information on the main developments during the related fiscal period:

This section includes important updates released after the H1 2026 period. You may access our previous report for H1 2026 by clicking on the relevant link.

Changes in CEO and Board Membership Positions

Mr. Murat Pınar, who served as the Chief Executive Officer of the Company, left his position as of July 31, 2026.

In this regard, the Board of Directors has decided to appoint Mr. Oğuzhan Özsürekci, Distribution Business Head of the Company, as Chief Executive Officer, effective August 1, 2026. Mr. Oğuzhan Özsürekçi continues to serve as the Acting Head of Distribution Business Unit of the Company, until a new appointment is made.

Furthermore, following Ms. Yeşim Özlale Önen's departure from her position as a Member of the Board of Directors of the Company as of July 31, 2026, Mr. Murat Pınar assumed the role of Member of the Board of Directors effective August 1, 2026.

Pre-license Term Extension

The Energy Market Regulatory Authority ("EMRA") Board has approved the request submitted by our subsidiary, Enerjisa Müşteri Çözümleri A.Ş., to the EMRA for the extension of the pre-license term of the "Polatlı Storage Solar Power Plant-1" dated June 22, 2023 and numbered ÖN/11931-25/05659.

Accordingly, it has been resolved to grant an additional period of 18 months and 9 days to the relevant pre-license and to amend the pre-license expiry date to December 31, 2027. Activities relating to the Project are being carried out in accordance with the applicable legislation.

Assignment of Liquidity Provider

Within the scope of liquidity providing activities carried out on Borsa İstanbul Equity Market, a liquidity providing service agreement was signed with Ak Yatırım Menkul Değerler A.Ş. based on the resolution adopted by our Company's Board of Directors, in order to start liquidity providing activity for our Company's shares. In this respect, the application submitted by Ak Yatırım Menkul Değerler A.Ş. to Borsa İstanbul A.Ş. on July 13, 2026 was approved on July 16, 2026.

In accordance with the signed agreement, liquidity providing transactions have been carried out by Ak Yatırım Menkul Değerler A.Ş., designated as the liquidity provider brokerage firm, through the liquidity provider customer account opened on behalf of our Company, since July 17, 2026 and in compliance with the applicable legislation.

Liquidity providing activity is an optional activity intending to increase the liquidity, thus the tradability of capital market instruments covered therein, and is not an activity aiming to ensure price stability. The liquidity provider contributes to liquidity, when deemed necessary, by transmitting buy/sell orders in its own name and for the account of our Company in the capital market instrument for which it is assigned. The liquidity provider discloses on KAP the amount, volume and buy/sell transactions carried out within this scope, on a share basis, once every two weeks by no later than the second trading day of the following week, in accordance with the format prescribed under the applicable legislation.

Reaching an agreement in the collective bargaining process

As disclosed in our material event disclosure dated April 16, 2026, following the expiry of the previous two-year Collective Bargaining Agreement effective as of March 1, 2024, collective bargaining negotiations between our Electricity Distribution

Companies (İstanbul Anadolu Yakası Elektrik Dağıtım A.Ş., Başkent Elektrik Dağıtım A.Ş. and Toroslar Elektrik Dağıtım A.Ş.) and TES-İŞ Union (Türkiye Energy, Water and Gas Workers' Union) commenced on April 2, 2026. The negotiations have been concluded successfully, and a new Collective Bargaining Agreement has been signed on 28.07.2026 between the parties for a term of two years. The Agreement is effective as of 01.03.2026.

About Corporate Governance Committee Membership Appointment

Our Company's Board of Directors has decided to appoint Mr. Murat Pınar, who was appointed as a Member of the Board of Directors in lieu of Ms. Yeşim Özlale Önen following her departure from our Company, and Ms. Ceylanpınar Atay, in lieu of Ms. Nergis Evrim Kılınçoğlu following the change in the Investor Relations Leader position, as members of the Corporate Governance Committee, within the framework of the Capital Markets Board's Corporate Governance Communiqué No. II-17.1 and the Corporate Governance Principles. Accordingly, the members of our Company's Corporate Governance Committee are as follows:

Kamuran Uçar (Independent Board Member) – Chairperson

Guntram Würzberg (Board Member) – Member

Murat Pınar (Board Member) – Member

Ceylanpınar Atay (Not a Board Member) – Member

Change in Chief Financial Officer (CFO) Position

Mr. Philipp Ralph Ulbrich, who served as the Chief Financial Officer (CFO) of our Company, left his position effective as of November 1, 2026.

In this regard, the Board of Directors of the Company has decided to appoint Mrs. Joanna Kepczynska as the Chief Financial Officer (CFO), effective as of November 1, 2026.

Uşak Seramik Concordat Proceedings

Uşak Seramik Sanayi A.Ş., a major customer of Enerjisa Müşteri Çözümleri A.Ş., filed for a composition with creditors (concordat) on September 28, 2026. By a court decision issued on September 29, 2026, the plaintiff company was granted a three-month provisional period for the composition of debts. During this provisional respite period, measures that could be taken to collect the debt—such as initiating enforcement proceedings against the debtor company or continuing enforcement actions already in progress—have been provisionally suspended. The court will hold a hearing on December 23, 2026, to evaluate whether to continue or terminate the composition proceedings. Enerjisa is closely monitoring the legal proceedings. Enerjisa is currently unable to fully assess the potential operational or financial impact of this event.

Bond Issuances

Enerjisa Enerji has issued a TL bond on 24.04.2026, amounting to TL 4,000,000,000 with 362 days term, interest with TLREF+0.5% rate, redemption date of 21.04.2027, and with TRFENSA42716 code.

Enerjisa Enerji has issued a TL bond on 25.05.2026, amounting to TL 2,000,000,000 with 1.094 days term, interest with TLREF+1.3% rate, redemption date of 23.05.2029, and with TRSENSA52916 code.

Enerjisa Enerji has issued a TL bond on 30.09.2026, amounting to TL 3,000,000,000 with 1.093 days term, interest with TLREF+1.75% rate, redemption date of 27.09.2029, and with TRSENSA52916 code.

MAJOR LEGISLATIVE CHANGES APPLICABLE TO SUBSIDIARIES

Board Decision of the Energy Market Regulatory Authority (2 July 2026 / 14718)

Under the Board Decision dated 2 April 2026 and numbered 14459, published in the Official Gazette dated 3 April 2026 and numbered 33213, the price limits applicable in the Day-Ahead Market and the Balancing Power Market were temporarily revised. Accordingly, effective from 4 April 2026 and until a new decision is adopted by the Board, the minimum price limit shall be applied as TL 0/MWh and the maximum price limit as TL 4,500/MWh. The amendment is relevant to Enerjisa Enerji's energy procurement, market pricing, forecasting and imbalance management processes within the scope of its retail and distribution activities, and the related impacts are monitored as part of the Company's existing risk management and operational processes.

Month	2026 Projected FiT Cost (TL/MWh)
July	423.99
August	450.45
September	581.14
October	526.39
November	488.86
December	393.75

Law No. 7589 on Amendments to Certain Laws to Ensure the Effective and Efficient Functioning of the Judiciary

The Law published in the Official Gazette dated 31 July 2026 and numbered 33326 linked the statutory interest rate applicable where no interest rate is specified in the contract to the rediscount rate of the Central Bank of the Republic of Türkiye (CBRT). Under the new framework, statutory interest is calculated at 80% of the rediscount rate in effect at the end of the preceding year and is adjusted during the second half of the year under certain conditions. Accordingly, the annual statutory interest rate applicable as of 31 July 2026 was set at 31%.

Presidential Decision No. 11752

The Medium-Term Programme (2027–2029) was approved by Presidential Decision No. 11752, published in the Official Gazette dated 6 September 2026 and numbered 33362 (Supplementary Issue). The key policy priorities relating to the energy and electricity sectors are as follows:

Closely monitoring electricity, natural gas and logistics costs to maintain industrial competitiveness and supporting energy efficiency investments.

Expanding electric vehicle charging infrastructure throughout the country.

Increasing the exploration and production of domestic energy resources and critical minerals to strengthen energy supply security and reduce external dependency, and developing electricity storage capacity to support the integration of renewable energy sources into the system.

Incorporating nuclear energy into the electricity generation portfolio, developing new projects and technologies to increase nuclear capacity, and increasing the domestic content of equipment used in nuclear power plants.

Establishing the regulatory framework for pumped-storage hydroelectric power plants and increasing the capacities of existing energy generation facilities through rehabilitation and maintenance works.

In addition, legislative amendments are envisaged for the second quarter of 2027 to increase electricity storage capacity to facilitate the effective integration of electricity generated from intermittent renewable energy sources, such as solar and wind, into the grid and strengthen system security, and to reduce import dependency in critical and strategic minerals and support domestic production.

MAJOR LEGISLATIVE CHANGES IN THE DISTRIBUTION BUSINESS

Law No. 7590 on Amendments to Certain Laws and Decrees Having the Force of Law, and Presidential Decree No. 11573

Public lighting financing has been extended until December 31, 2030, with higher contributions deducted from general budget tax revenue shares:

Law No. 7590 (Official Gazette No. 33326, July 31, 2026) amended Transitional Article 6 of Electricity Market Law No. 6446, increasing contribution rates from 10% to 30% for metropolitan municipalities

and municipalities within their contiguous areas, 5% to 15% for other municipalities, and 10% to 30% for provincial special administrations. The President retains the authority to extend the period by up to five years and double these rates.

Presidential Decision No. 11573 (Official Gazette No. 3335, August 9, 2026) subsequently set deductions at 60% of lighting expenses for metropolitan municipalities and municipalities within their contiguous areas, and 30% for other municipalities. 60% of expenses exceeding the applicable limits will be deducted from the relevant provincial special administration's share.

Council of Ministers Decision No. 2014/6784, dated September 8, 2014, was repealed. The changes entered into force upon publication, effective from January 1, 2026.

Procedures and Principles Regarding Amendments to the Procedures and Principles for Supporting Research, Development, and Innovation Activities of Electricity and Natural Gas Distribution Companies

Board Decision No. 14846 dated September 3, 2026 (Official Gazette No. 33361, September 5, 2026) requires distribution companies to allocate at least 15% of their R&D budgets to P&D activities and raises the additional budget allowance per patent to TL 1.5 million, indexed to CPI. Testing and intellectual property expenses may be covered from the R&D budget against supporting documents submitted at project completion. Applications must include the relevant unit's assessment of the use of project outputs in distribution activities, while distribution companies must hold at least 20% of intellectual property rights. Revenues from R&D/P&D outputs must be reflected in tariff calculations, affecting project evaluation, contracting, revenue management and tariff processes. The April and October application schedule takes effect on January 1, 2027.

MAJOR LEGISLATIVE CHANGES IN THE RETAIL BUSINESS

Regulation on Zoning and Licensing Procedures for Wind and Solar Power Generation Facilities

The Regulation on Zoning and Licensing Procedures for Wind and Solar Power Generation Facilities (the "Regulation"), published in the Official Gazette dated 24 July 2026 and numbered 33319, sets out the procedures and principles governing zoning plans, land subdivision plans, construction permits, occupancy permits, and workplace opening and operating licences for wind power plants (WPPs) and solar power plants (SPPs) holding a pre-licence or generation licence. The Regulation also regulates plan approval and objection procedures, licensing processes, and actions to be taken in respect of unlicensed or non-compliant constructions. The Regulation entered into force on the date of its publication.

Board Decision of the Energy Market Regulatory Authority (30.07.2026 / 14766)

With the Board Decision numbered 14766, published in the Official Gazette dated 1 August 2026 and numbered 33327, it has been decided to determine the Turkish Average Wholesale Electricity Price for 2025 (TORETOSAF) as 266,05 kuruş/kWh within the scope of Law No. 5346 on the Use of Renewable Energy Resources for Electricity Generation.

MAJOR LEGISLATIVE CHANGES IN THE E-MOBILITY BUSINESS

Amendments to the Charging Service Regulation

In addition to the matters stated in the previous Activity Report, pursuant to the amendment to the Charging Service Regulation published in the Official Gazette dated 23 March 2026, the software systems used by charging network operators in the provision of charging services, as well as the IT infrastructure supporting processes related to remote access to charging devices and such systems, must comply with the current version of the TS ISO/IEC 27001 standard. In this regard, a period of one year from the effective date of the amendment has been granted for the software systems to be certified in accordance with the TS ISO/IEC 27001 standard. The deadline for compliance with this obligation is 23 March 2027.

b) Information on the investments made by the Company during the related fiscal period:

Within the period between 01 January 2026 and 30 September 2026, the Company made investment expenditures related to the concession agreement amounting to TL 21,725,555,000 (TL 20,097,645,000 of this investment amount consists of the main balance arising from the presentation before TAS 29 and TL 1,627,910,000 consists of the monetary gain arising from the 30.09.2026 purchasing power indexation presentation after TAS 29) and TL 3,260,043,000 of tangible and intangible assets.

c) Information on the internal control system and internal audit activities of the Company and the related opinion of the management body:

Internal audit activities related to the efficiency of the internal control system of the Company are planned and conducted by the Internal Audit department. The audit results are shared with Enerjisa Enerji A.Ş. Audit Committee composed of independent Board of Directors members only and the Company management and the planned actions are monitored.

Enerjisa Enerji Internal Audit department directly reports to the Audit Committee, which is a sub-committee of the Enerjisa Board of Directors per the necessity of independence and objectivity principles. The purpose of internal audit is to provide an opinion to the Board of Directors about the compliance of the Company and its subsidiaries' activities with laws, other applicable legislation, internal strategies, policies and procedures and the effectiveness and adequacy of internal controls. With these efforts and structuring, it is aimed to take preventive measures, protect the Company assets, improve business processes and provide added value for the entity by way of giving opinions and suggestions to increase operational efficiency. In accordance with this objective, internal audit activities are conducted in the frame defined by approved audit committee and internal audit charters. The risk assessment results of the Company are updated every year and the risk-based annual internal audit plan is submitted to the approval of the Audit Committee and the Board of Directors after obtaining the comments of the management. Each year, the audits within the scope of the approved audit plan are performed in accordance with international audit standards and COSO (Committee of Sponsoring Organizations of the Treadway Commission) requirements. Full compliance to the International Audit Standards was certified again in 2023, with the independent quality assurance audit conducted by KPMG.

Internal Audit is responsible for the evaluation and examination processes of ethics notifications related to the employees and other stakeholders (shareholders, customers, suppliers, public institutions). In addition to its auditing function, internal audit also provides consultancy services in line with its vision and mission, as required by its principle of being a "reliable business partner" and upon the requests of the executive management.

d) Information on the Company's direct or indirect participations/subsidiaries and the share ratios:

The direct and indirect participation shares held by the Company are as follows:

	Place of incorporation and operation	Proportion of ownership interest and voting power held by the Group (%)		Principal activity
		30 September 2026	31 December 2025	
Başkent Elektrik Dağıtım A.Ş.	Ankara	100	100	Electricity Distribution Services
Enerjisa Başkent Elektrik Perakende Satış A.Ş.	Ankara	100	100	Electricity Retail Services
İstanbul Anadolu Yakası Elektrik Dağıtım A.Ş.	İstanbul	100	100	Electricity Distribution Services
Enerjisa İstanbul Anadolu Yakası Elektrik Perakende Satış A.Ş.	İstanbul	100	100	Electricity Retail Services
Toroslar Elektrik Dağıtım A.Ş.	Adana	100	100	Electricity Distribution Services
Enerjisa Toroslar Elektrik Perakende Satış A.Ş.	Adana	100	100	Electricity Retail Services
Enerjisa Müşteri Çözümleri A.Ş.	İstanbul	100	100	Renewable Energy and Energy Efficiency Solutions
E-şarj Elektrikli Araçlar Şarj Sistemleri A.Ş.	İstanbul	100	100	Electric Vehicles and Charging Stations Services
Enerjisa Araç Filo Hizmetleri A.Ş.	Ankara	100	100	Operational Car Rental and Fleet Services

e) Information on the own shares of the Company acquired:

The company does not own any shares in the related period.

f) Information on private audit conducted in the fiscal period:

None.

g) Information on legal actions filed against the Company which might adversely affect the financial situation and operations of the Company and their possible consequences:

In lawsuits filed against three companies in 2021 seeking the payment to TEDAŞ of advertising, rent, and similar revenues generated by electricity distribution companies, the courts of first instance ruled to dismiss the cases. As a result of the appellate review, in accordance with the principle of adherence to the claim, the court ordered that 1,000 TL be collected from the Company and paid to TEDAŞ. An appeal was filed against the aforementioned decision, and following a review by the Court of Cassation, it was determined that, in accordance with the provisions governing unauthorized acts, the revenues in question retained by the Company must be calculated for a ten-year period retroactive to the date of the lawsuit and paid to TEDAŞ, together with advance interest.

In this context, since it will be necessary to calculate revenues for the ten-year period retroactive to 2021 and apply advance interest to the calculated amounts, a table containing litigation information by region has been included in the report.

	COURT	CASE NO
BAŞKENT	Ankara 7th Commercial Court of First Instance	2021/189
AYEDAŞ	Ankara 14th Commercial Court of First Instance	2021/184
TOROSLAR	Ankara 3th Commercial Court of First Instance	2021/205

h) Information on the administrative or judicial sanctions imposed on the Company and the members of its management body for practices in breach of the provisions of applicable legislation:

During the relevant period, no administrative or judicial sanctions were imposed on the company or members of its governing body due to practices that violated statutory provisions.

i) Information and evaluation on whether the goals set in the previous periods were achieved, and whether the decisions of the general assembly were implemented, and if not, the related reasons for failure to achieve such goals or to implement such decisions:

The Company has achieved its budgetary targets for the period of 01.01.2025 – 31.12.2025. Details are specified in the section of “Financial Situation” in the activity report as of 31.12.2025. The 9M 2026 performance of the Company is explained in the section of “Financial Situation” in this activity report for the period of 01.01.2026 – 30.09.2026.

j) If any extraordinary general assembly meeting has been held during the year, information on such extraordinary general assembly meeting including the date of the meeting, the decisions taken in such meeting and the related activities:

No such meeting has been held.

k) Information on the Company’s donations and aids and its expenditures made on social responsibility projects during the year:

The Company has made donations and aids at the amount of TL 7,531,000 within the period of 01.01.2026 – 30.09.2026.

l) If a company operating under a group of companies; legal actions taken with the parent company, or any subsidiary of the parent company in favor of the parent company or any subsidiary thereof upon the instructions of the parent company and all the other measures taken or avoided in favor of the parent company or any subsidiary thereof in the previous fiscal year:

There are no legal actions that we have taken with Hacı Ömer Sabancı Holding A.Ş., E. ON International Participations N.V. or any subsidiary thereof or in favor of them or any of their subsidiaries upon their instructions; and there are no actions taken or avoided in favor of Hacı Ömer Sabancı Holding A.Ş. and E. ON International Participations N.V. or any of their subsidiaries.

m) The company's sources of finance and the nature and value of the capital markets instruments issued, if any:

Enerjisa Enerji A.Ş. creates new financing sources through loans and bonds in Turkish Lira.

The Group has a total of TL 44,430,000,000 bonds (issued amount) in circulation as of 30.09.2026.

Issuer	Notional (million TL)	Interest / Return Rate (%)	Issue Date	Maturity Date
Enerjisa Enerji A.Ş.	2,200	TLREF + 1.00%	21.10.2024	19.10.2026

Total	**44,430**			

n) Information on potential conflict of interests with consultancy and rating services obtained by the Company and preventive actions:

Our Company acts in accordance with Code of Ethics, Third Party Relations Policy and Conflict of Interest Policy which can be found in the below links.

Code of Ethics

Third Party Relations Policy

Conflict of Interest Policy

o) Events that occurred after the reporting period:

CMB application on domestic debt securities issuance

On 15.10.2026, in accordance with the authority given by the Company's Articles of Association and with the provisions of the Capital Markets Board's Communiqué on Debt Securities (VII-128.8), our Board of Directors have decided on issuance of debt securities for a total amount up to TL 80,000,000,000 (eighty billion Turkish Lira) denominated in Turkish Lira, with various maturities up to 7 (seven) years, to be sold to domestic qualified investors without public offering, and in one or more times. Within this resolution scope, necessary approval application has been made to the Capital Markets Board on 19.10.2026.

p) Other issues not included in the financial statements, but useful to know for interested parties:

Regulated Asset Base (RAB) increased from TL 83.6bn in YE 2025 to TL 111.5 billion in 9M 2026, primarily driven by the revaluation impact and the acceleration of strategic grid investments. While principal repayments related to investments partially offset this increase, the combined effect of revaluation and strong capex execution resulted in a robust net RAB expansion.

q) If a company operating under a group of companies; information about whether a counter action was provided appropriate for each legal action and whether the measure taken or avoided caused the company to suffer a loss; and if the company suffered a loss, whether it was compensated or not according to the situation and conditions known by them at the time when the legal action or the measure mentioned in the subparagraph (l) was performed or taken or avoided:

To the best of the Company's knowledge of current conditions, the legal actions taken by the Company with the controlling companies or any of their subsidiaries or in favor of the controlling companies or any of their subsidiaries upon the instructions of the controlling companies and all the other measures taken or avoided in favor of the controlling companies or any of their subsidiaries in the fiscal period of 01.01.2026 - 30.09.2026 were evaluated in the form of a report under the scope of all transactions performed between the Company and the controlling company and its affiliated companies during the Fiscal Period of 01.01.2026 - 30.09.2026 , which were conducted in full conformity with the honest and fair accounting principles according to the conditions well known to us. The Company did not suffer any loss resulting from any transaction executed under known conditions in connection with the Fiscal Period of 01.01.2025- 31.12.2025.

r) Information on cross shareholding of subsidiaries with above 5% ownership:

There is no cross shareholding.

s) Information on Corporate Social Responsibility activities of the company related to social rights of employees, vocational trainings and other social and environmental aspects:

This related information can be accessed from the link below.

Enerjisa Sustainability

FINANCIAL SITUATION

a) Management body's analysis and assessment of the financial position and operational results, the extent of realization of planned activities, and the company's position against defined strategic goals:

The figures provided in this section have been adjusted for inflation accounting and the 9M 2025 figures have also been restated to reflect the purchasing power parity of 9M 2026, unless stated otherwise.

Operational Earnings (EBITDA + Capex reimbursements) of Enerjisa Enerji A.Ş. increased from TL 55.3 billion in 9M 2025 to TL 62.1 billion in 9M 2026 The increase was mainly driven by higher financial income in the Distribution business. This reflected a higher Weighted Average Cost of Capital (WACC) and an upward revision of medium- and long-term inflation assumptions, as inflation declined more slowly than expected. In contrast, the contribution from the Retail and Customer Solutions businesses remained limited due to the prevailing market conditions.

Distribution business unit's operational earnings of TL 54.8 billion accounted for 88% of Enerjisa Enerji's operational earnings in 9M 2026. The main drivers in the operational earnings of the Distribution business unit in 9M 2026 compared to 9M 2025 are as follows:

- Financial income increased by 43% to TL 30.5 billion, driven by a larger Regulated Asset Base and higher inflation index expectations compared with the prior year, as regulated returns are linked to inflation. Growth was further supported by the increased Weighted Average Cost of Capital (WACC) under the new regulatory framework.
- Capex Reimbursements increased by 23% annually reaching TL 20.9 billion in 9M 2026 thanks to higher RAB, Capex ceiling, indexation impact.

The Retail Sales business contributed 9% to operating earnings in 9M 2026. Regulated market gross profit declined by 20% year-on-year to TL 5.5 billion, mainly due to lower sales volumes in regulated activities and the negative impact of lower real energy prices. Meanwhile, gross profit from the free-market segment increased from TL 2.2 billion to TL 3.4 billion in 9M 2026, supported by higher sales volumes and improved gross margins.

Following the revision in the Last Resort Tariff Limits, sales volume in the regulated market decreased from 23.4 TWh in 9M 2025 to 21.7 TWh in 9M 2026. In contrast, sales in the liberalized market segment increased over the same period, rising from 12.9 TWh in 9M 2025 to 13.8 TWh in 9M 2026.

The Customer Solutions business recorded a 39% real decline in gross profit to TL 4.5 billion in 9M 2026, reflecting the completion of existing projects and the adoption of a more selective growth strategy for new projects under the current market conditions. Operating earnings also declined from TL 4.2 billion to TL 1.9 billion over the same period. This decrease was mainly driven by a more selective approach to new energy efficiency projects following the completion of existing projects amid the prevailing market environment. Total installed capacity remained 146.4 MWp.

Enerjisa Enerji A.Ş. Underlying Net Income increased by 58% in real terms from TL 7.4 billion in 9M 2025 with 2026 prices to TL 11.6 billion in 9M 2026. Below operational earnings line, the main effects in real terms were as follows:

- TL 1.5 billion lower financing net interest expenses, including net loan and bond interest expenses and operational FX gains/losses, driven by lower average financing rates and backloading our Capex.

As a result of the slowdown of inflation compared to the previous year, the monetary loss decreased by TL 0.5 billion. The average financing rate decreased from 46.1% in 9M 2025 to 38.7% in 9M 2026. Economic Net Debt (financial net debt plus lease liabilities and customer deposits) of TL 78.2 billion (with December 2025 purchasing power) at year end 2025 is realized as TL 101.0 billion at 9M 2026.

Net Financial Debt of TL 63.5 billion (with FY 2025 purchasing power) at year end 2025 is realized as TL 83.3 billion in 9M 2026.

b) Company's sales, productivity, income generation capacity, profitability and debt to equity ratio within the year in comparison with the previous years, and information on any other issues that might suggest the company's operational results and future expectations:

The figures provided in this section have been adjusted for inflation accounting and the 2025 figures have also been restated to reflect the purchasing power parity of 2026, unless stated otherwise.

The Company's gross profit in 9M 2026 is TL 59.0 billion (9M 2025: TL 54.0 billion). The Company's net debt / (net debt + equity) ratio as of 30 September 2026 has been recorded as 41.7% (31 December 2025: 40.6%). No going concern risk is predicted for the Company.

c) Determination about whether the Company's capital has remained without reserve or whether it has run into debt and the management body's evaluations related thereof:

The Company is not in a deep-in-debt (technical bankruptcy) situation according to the evaluations made pursuant to Article 376 of the Turkish Commercial Code.

d) Measures planned to improve the financial structure of the Company, if any:

Since the Company's financial and capital structures are strong, there are no measures planned to be taken to improve the financial structure of the Company.

e) Information on the dividend distribution policy and, if there will be no dividend distribution, a proposal on how to allocate retaining earnings with its justification:

Information on the dividend distribution policy can be found in the link below.

Enerjisa Enerji Dividend Policy

Distribution of cash dividend of TL 5,999,830,352.97 in total was resolved at the Ordinary General Assembly Meeting dated 25.03.2026 and distributed as of 13.04.2026.

AMENDMENTS TO ARTICLES OF ASSOCIATION MADE IN THE PERIOD AND THE RELATED REASONS

At the Ordinary General Assembly Meeting of the Company for the year 2025, held on March 25, 2026, and in line with the approvals obtained from the Capital Markets Board and the Ministry of Trade, Article 7 of the Company's Articles of Association titled "Capital and Shares" was amended, and the Company's registered capital ceiling was increased from TL 4,000,000,000 to 10,000,000,000. The authorization for the registered capital ceiling is valid for the period between 2026 and 2030 (5 years).

RISKS AND THE EVALUATION OF THE MANAGEMENT BODY

Board of Directors Meetings

As of 30.09.2026, the Company's Board of Directors convened three times in total to evaluate strategic matters concerning the Company. The attendance rate of Board meetings was 94%.

Committees

i. Corporate Governance Committee

Following the IPO in February 2018, the Corporate Governance Committee has been enacted at the General Assembly Meeting held on 29.03.2018. According to the Committee Charter effective as of 01.04.2022, members of the Committee are selected from Board members and Investor Relations Manager. The Committee is chaired by an independent Board Member.

The purpose of Corporate Governance Committee is to make suggestions to the Board of Directors of the Company in order:

- To ensure the compliance of the corporate governance principles of the Company with the Corporate Governance Principles as determined by the Board and other internationally accepted corporate governance principles and best practices,
- To make advices in order for implementation of such principles,
- To follow-up compliance of the Company with such principles.

This Committee also performs the governance related duties of the Nomination Committee and the Remuneration Committee within the Company.

Corporate Governance Committee Charter can be viewed from the below link.

Enerjisa Enerji Corporate Governance Committee Charter

The Corporate Governance Committee had three meetings during 9M 2026. Corporate Governance Committee members are as follows:

Name Surname	Duty	Duty in the Board
Kamuran Uçar	Corporate Governance Committee Chairperson	Independent Board Member
Guntram Würzberg	Corporate Governance Committee Member	Board member
Murat Pınar	Corporate Governance Committee Member	Board member
Ceylanpınar Atay*	Corporate Governance Committee Member	Investor Relations Leader

**Our Company's Board of Directors has decided to appoint Ms. Ceylanpınar Atay as member of the Corporate Governance Committee.*

ii. Early Risk Detection Committee

The Board delegates the monitoring of risks to the Early Risk Detection Committee (ERDC). Members to the Committee are selected Board Members (including two independent members) and the Committee is chaired by an independent Board member. Aside from receiving regular Risks and Opportunities Report, each meeting agenda includes an in-depth review of a prioritized topic. The ERDC reports directly to the Enerjisa Enerji Board.

ERDC is responsible to advise Board regarding risk and opportunity definitions which threat Company's existence and strategies, relevant mitigation actions, early detections and precautions. Following Board review, agreed actions are monitored by the Enerjisa Enerji CFO and ERDC.

ERDC Charter can be viewed from the below link.

Enerjisa Early Risk Detection Committee Charter

The ERDC meetings and report circulations to the committee are organized at least six times per year.

In this scope, it was held three times in form of physical meeting and four e-mail circulation as 30.09.2026.

ERDC members are as follows:

Name Surname	Duty	Duty in the Board
Mehtap Anık Zorbozan	Chairperson	Independent Board Member
Kamuran Uçar	Committee Member	Independent Board Member
Nusret Orhun Köstem	Committee Member	Board Member
Diddo Diddens	Committee Member	Board Member

iii. Audit Committee:

Activities of the Internal Audit Department are regularly reported to the Audit Committee. In this scope, four Audit Committee meetings were held during 9M 2026. Through these meetings, the Audit Committee was informed on topics including, but not limited to, improvement areas identified in audit/consultancy activities and relevant action plans, results of follow-up activities, information about performed ethics investigation activities and significant considerations about other activities.

Audit Committee Charter can be viewed from the below link.

Audit Committee Charter

Audit Committee members are as follows;

Name Surname	Duty	Duty in the Board
Mehtap Anık Zorbozan	Chairperson	Independent Board Member
Kamuran Uçar	Committee Member	Independent Board Member

Risk Assessment

a) Risk Management Approach

Enerjisa Enerji aims to ensure sustainable and predictable profitability by effectively managing the risks in the energy markets and to protect the value created as a result of sales and distribution activities with its risk management policies.

Setting risk management as an integral part of strong management, Enerjisa Enerji's Risk Management Framework aims to identify risks and opportunities which may impact the Company's financial, operational and strategic plans. The framework enables assessment, classification, and mitigation of these risks through various methodologies. The ultimate aim of this framework is to provide transparency to management functions and to support decision making processes through regular reporting.

Enerjisa Enerji acts in accordance with the principle of assigning responsibility to the business units in risk identification and risk management as recommended by quality standards in this field such as COSO and ISO 31000. In this context, risk coordinators were appointed in the business units to act as a bridge between the departments and the central risk management function.

Risk management workshops are held annually with the risk coordinators and process owners of the business units in order to raise awareness for risk management. In these workshops, the important topics of the previous year, the annual risk management calendar and risk analysis, consolidation and reporting methodology are discussed.

b) Risk Governance Structure

Enerjisa Enerji utilizes both mandatory committees in accordance with legislation and non-mandatory committees in order to ensure an effective and functional risk management. Established under the CFO organization, the Central Group Risk Management function is responsible for scoring risks, monitoring and improving risk management processes, and periodically reporting risks along with their impacts and improvement actions. The findings and risk management objectives, compiled by the central risk management function, are first presented to the Risk Management Committee, formed of the senior executives of all business units and chaired by the CFO.

At the next stage, these findings are presented to the Early Detection of Risk Committee, which is formed of the members of the Board of Directors. The Early Detection of Risk Committee is responsible for advising the Board of Directors of risks and opportunities, which may affect the existence and strategies of the Company, related mitigation actions, early detection processes and measures, as well as monitoring the effectiveness of the risk management processes. The Early Detection of Risk Committee is chaired by an independent board member. Following the Board review, agreed actions are monitored by the CFO and the Early Detection of Risk Committee.

c) Risk Management Procedure

The risks and opportunities which Enerjisa Enerji is exposed to, are identified with a detailed assessment study. This study is elaborated with two different approaches, i.e., qualitative and quantitative risk reporting methodology.

1. Quantitative risk and opportunity methodology: For each risk and opportunity, the best-case, base case and worst-case scenarios are collected from the business units. The probabilities of realization of these risks and opportunities are determined, simulated by using numerical analysis methodologies and grouped according to their expected values. During the consolidation of the impacts of risks and opportunities, correlations are taken into account and any fluctuation which may affect the Company's net profit are reported.
2. Qualitative risk reporting methodology: Risks whose direct financial impacts cannot be quantified but which have the potential to have a negative impact on the Company's strategic and operational activities are prioritized through the scales, which are defined according to their impact levels and probabilities, and reported with risk heat-maps. These studies form the basis of the Risks and Opportunities Report submitted to the senior management and the Early Detection of Risk Committee.

d) Basic Categories of Risk and Opportunity

Enerjisa Enerji establishes risk management systems and prepares action plans in order to minimize the occurrence of financial and non-financial risks and their effects in order to maximize the value it creates for its stakeholders.

Financial and non-financial risks are mapped by identifying their effects on the sector and operations. The risk mapping process consists of three stages - identification, assessment and classification - covering the regular reporting and decision-making processes and enabling transparency.

Financial Risks and Opportunities

The nature of electricity distribution and retail sales activities exposes the sector players to various risks and opportunities in the value chain. At Enerjisa Enerji, risks and opportunities are categorized and monitored according to their sources. These risks are followed up and prioritized depending on their possible impact levels and recorded with risk mitigating practices. Following the sensitivity analysis, quantifiable risks and their financial implications are reported.

i. Regulatory Risks and Opportunities

Electricity distribution and retail sales activities are regulated businesses which are carried out under the supervision of EMRA and are governed according to the principles determined by the Electricity Market Law and secondary legislation. Enerjisa Enerji applies the National Tariff determined by EMRA to its regulated customers. The National Tariff consists of the tariffs to be applied to the transmission and distribution system users. EMRA determines the items of the National Tariff for each tariff period.

Revenue requirement and/or price ceilings for regulated activities is determined by EMRA and reflected to the end consumer through the National Tariff mechanism by taking into account all costs and services for the execution of the relevant activity in the fourth regulatory period, which will

apply between 01.01.2021 - 31.12.2025, as in the previous regulatory periods.

Since the majority of the Company's revenues are derived from electricity distribution activities and retail sales to regulated customers at a tariff set by EMRA, changes in any component of this tariff may lead to a significant deviation in Enerjisa Enerji's plans.

In addition, regulations issued by EMRA include organizational and operational requirements and limitations regarding retail sales and distribution activities. These requirements and limitations are audited by regulatory authorities (primarily EMRA) and findings of any non-compliance may adversely affect Enerjisa Enerji's financial and operational plans.

Enerjisa Enerji conducts regular and constructive reviews with industry participants and regulatory bodies in order to manage regulatory risks and opportunities. The Company also engages in rational and fact-based negotiations with other market participants and regulatory bodies as the market leader through systematic projects and transparent reporting. As a result of the meetings conducted and in-house activities, work and initiatives are carried out which will positively contribute to all sector stakeholders, including consumers, and legislative measures in order to support the sustainability of the sector.

ii. Market Risks and Opportunities

Enerjisa Enerji is exposed to interest rate fluctuations in financial markets as a result of its financial debt, and to exchange rate fluctuations due to the Renewable Energy Resources Support Mechanism (FIT).

Enerjisa Enerji is also affected by volatility in over-the-counter market pricing and trading volumes in the commodity markets due to retail sales activities, as well as volatility in prices of other products due to material procurement in distribution activities (procurement is conducted in TL terms, but prices are correlated with prices in commodity markets).

Enerjisa Enerji uses systematic approaches in order to estimate market parameters such as price, inflation, interest rates, exchange rates and demand in the most realistic way. Existing and expected exposures are checked on a regular basis and maintained at an optimum level with hedging transactions. Derivative transactions and the effectiveness of these transactions are periodically discussed within the Finance Committee and the Commodity Risk Committee.

iii. Credit Risks and Opportunities

Enerjisa retail companies are exposed to credit risk due to sales in the regulated and liberalized markets.

Enerjisa distribution companies, on the other hand, are exposed to credit risk due to the system usage receivables to be collected from retail companies that provide retail sales services using the distribution network. In addition, invoicing for theft/illegal electricity use also poses credit risk in collection processes.

Enerjisa Enerji manages its credit risk by obtaining security deposits from regulated customers, letters of guarantee or other types of guarantees from liberalized customers. Timely invoicing, efficient receivables management and monitoring the credit ratings of large customers enables Enerjisa Enerji reduce its credit risk as much as possible.

In addition to carrying out reporting and follow-up activities aimed at reducing the credit risk arising from financial transactions, the Company works only with the counterparties having credit rating of maximum of two notches below the sovereign rating. In addition, steps are also taken to ensure the diversification of banks in the portfolio of financial derivative instruments and deposits.

iv. Liquidity Risk

Enerjisa Enerji is exposed to liquidity risk due to network investments in the distribution business or temporary funding needs driven by collection performance in the retail business. Although the Company believes this funding need can be covered by external debt capital providers, there is a risk that market conditions could limit conventional liquidity sources.

In periodically performed budget simulations where Risk Management Department highlights the levels of potential deviations from "Best Estimate" of given Net Income of the year, the most vulnerable month in regards to cash need and the level of cash volume exposed via market, operational, regulatory and credit related uncertainties is also highlighted. Additionally, this stress test is modelled in monthly intervals unlike routine budget estimates (the company were using mostly yearly aggregate cash scenarios).

Enerjisa Enerji manages liquidity risk by extending the average tenor of its debt portfolio and developing alternative debt capital sources such as corporate bonds, etc. In addition, the Company regularly forecasts its short and medium-term cash

needs in order to anticipate the liquidity need in a timely manner and to take action accordingly.

v. Operational Risks

All processes in Enerjisa Enerji's value chain are exposed to operational risks arising from internal and external factors. Relevant procedures and policies are established for all operational risks and published in Enerjisa Enerji's quality management systems. Committees are appointed to review realizations and manage risk mitigation activities.

Non-Financial Risks and Opportunities

The risks and opportunities which financial impact cannot be measured are grouped under 5 headings as Occupational Health and Safety (which mostly pertains to the distribution business), Environment, Information Technologies, Economic (without material impact) and Reputation and are examined with mitigation plans.

The following 3 risks and opportunities are prioritized.

i. Occupational Health and Safety Risks and Opportunities

Enerjisa Enerji conducts with its Occupational Health and Safety (OHS) activities in line with the "Vision Zero" approach. OHS risks and opportunities are managed within the scope of the ISO 45001:2018 Health and Safety Management System Standard. As stated in the OHS policy committed by the senior management, Enerjisa Enerji considers that occupational accidents are preventable and takes measurable and proactive actions accordingly.

ii. Environment Risks and Opportunities Related to Climate Crisis and the Environment

As Enerjisa Enerji, we consider the systematic identification, assessment, and mitigation of the environmental impacts arising from our operations and our dependencies on natural resources as a core element of our corporate governance approach. We address environmental matters not only under the scope of operational performance, but also as an integral part of our strategic decision-making processes, our risk management framework, and our long-term value creation objectives. In this context, we prioritize topics, including environmental impacts, within the scope of our Double Materiality Assessment (DMA) by evaluating them in terms of both impact significance and financial implications. Throughout the analysis process, we assess together the impacts of our activities on the environment and society, as well as the potential effects of environmental developments on our financial performance, and integrate the outcomes into our strategies, targets, and action plans.

We conduct the identification and management of sustainability- and climate-related risks and opportunities in alignment with the Türkiye Sustainability Reporting Standards (TSRS). We design our risk assessment process to incorporate both qualitative and quantitative factors, evaluating the nature of risks, their likelihood of occurrence, potential magnitude of impact, time horizon (short, medium, and long term), and financial consequences in an integrated manner. We analyze physical and transition risks separately and extend our assessments beyond current conditions by considering potential impacts under different climate and sustainability scenarios. Our scenario analyses are structured to address possible implications for operational continuity, asset resilience, cost structure, regulatory compliance, and revenue projections.

We integrate the climate- and sustainability-related risks and opportunities we identify into our overall risk management processes and monitor them within our corporate risk inventory. Through working groups comprising representatives from our business units, we conduct comprehensive risk and opportunity assessments across our value chain and operations. We ensure that each unit reports the risks and opportunities related to its area of activity—without applying materiality thresholds—together with their underlying drivers and financial or non-financial impacts. In this way, we provide transparent and comparable reporting on the effects of sustainability and climate-related risks and opportunities on our financial outlook.

We carry out the prioritization and oversight of risks within our corporate governance structure in line with clearly defined responsibilities. While the Early Risk Detection Committee is responsible for the prioritization of overall risks, sustainability and climate-related risks are regularly monitored by the Sustainability Executive Committee and overseen by the Early Risk Detection Committee. Ultimate oversight and strategic guidance are provided by our Board of Directors. Through this governance structure, we maintain a system aligned with the governance, strategy, risk management, and metrics and targets pillars of TSRS.

As part of our efforts to combat climate change, we regularly calculate our corporate carbon footprint, monitor our greenhouse gas emissions, and implement actions in line with our reduction targets. Under our current Climate Strategy, we aim to reduce our Scope 1 and Scope 2 emissions by 30% by 2030 compared to our 2021 base year, and to decrease the emission intensity of sold electricity under Scope 3 by 40%. We have also committed to aligning our business model with our Net Zero pathway by 2050.

Our 2025 emissions reduction performance was in line with our mid-term projections and confirmed the robustness of our emissions reduction roadmap and underlying assumptions. In 2025, primarily driven by the decline in emissions related to theft and loss (T&L) activities, we achieved an absolute reduction of 26.5% in our Scope 1 and Scope 2 emissions. This performance exceeded our publicly disclosed mid-term targets. In parallel, we achieved a 26.1% reduction in the emission intensity of sold electricity under Scope 3. This strong performance was mainly attributable to the renewable electricity sales ratio across our overall portfolio remaining broadly aligned with our initial scenario assumptions.

We address biodiversity and circularity within the same systematic framework. We analyze the direct and indirect impacts of our operations on natural ecosystems, as well as our dependencies on these ecosystems, and develop action plans in line with identified priority areas. We integrate the long-term priorities defined in our Biodiversity Strategy and Targets Statement and our Circularity Strategy and Targets Statement into our operational processes and monitor them through performance indicators. By optimizing resource use, reducing waste generation, and preserving the economic value of materials for as long as possible, we promote circular economy principles across our operations.

Through this holistic approach, we aim to reduce our environmental impacts, manage sustainability and climate-related risks from a financial perspective, and create long-term value for all our stakeholders. We take part in various initiatives related to climate change and energy efficiency, collaborate with non-governmental organizations and regulatory authorities, and develop R&D projects. At the same time, we contribute actively to the transition to a low-carbon economy by offering solutions that support our customers in reducing their carbon emissions.

iii. Information Technologies Risks and Opportunities Related to Digitalization and Customer Privacy

Enerjisa Enerji takes all necessary precautions in order to ensure confidentiality and security of customer information and personal data at the highest level within the framework of the legislation in force. Within that scope, rules and actions determined in accordance with corporate policies are implemented within the Company.

A holder of the ISO 27001 Information Security Management System certificate, Enerjisa Enerji fully complies with the Law on the Protection of Personal Data and provides trainings to its employees and suppliers on PDPL and information security, under the supervision of the Personal Data Protection Committee. There is a Cyber Incident Response Team under the Cyber Security Group Management to manage cyber-attack risks. In addition, the Company also has cyber risk insurance.

DUTIES OF THE MEMBERS OF THE BOARD OF DIRECTORS AND EXECUTIVES CONDUCTED OUT OF THE COMPANY

Duties of the members of the Board of Directors and Executives conducted out of the Company is reported at the Public Disclosure Platform under the “Company Management” section.

EBITDA	**41,259**	**38,122**
Capex reimbursements	20,878	17,019
EBITDA + Capex reimbursements	**62,137**	**55,141**
Non-recurring (income) / expense	-	112
Operational Earnings	**62,137**	**55,253**
Reported Net Income	**6,681**	**578**
Non-recurring (income) / expense	-	76
Impact of asset revaluation	4,954	6,721
Underlying Net Income	**11,635**	**7,375**

Operational Earnings refers to EBITDA plus CAPEX reimbursements excluding exceptional items. Enerjisa Enerji distribution companies are subject to the application of TFRIC12 (a TFRS standard that governs accounting for service concession arrangements). Accordingly, the Company accounts its license to operate and invest in the networks as a financial asset. This asset is not depreciated. Accordingly, P&L does not include depreciation expenses of networks. Similarly, P&L also excludes the reimbursement of CAPEX (i.e., the depreciation allowance) as a revenue item. This means that the Company's EBITDA figure is not comparable to international peers that do not apply TFRIC12 accounting and the management uses Operational Earnings as a KPI for comparability.

Underlying Net Income refers to Net Income excluding exceptional items. Exceptional items mostly refer to the non-recurring items. The resulting KPI sets the basis on which the Company's dividend pay-out policy is applied.
