4- COMPANY'S OPERATIONS AND RELATED MAJOR DEVELOPMENTS

a) Information on the main developments during the related fiscal period:

International credit rating agency Fitch Ratings has affirmed the National Long-Term Ratings of Enerjisa Enerji A.Ş. and its subsidiary, Başkent Elektrik Dağıtım A.Ş. at 'AA (tur)' with Stable Outlooks on 17 January 2020.

The Company held its Ordinary General Assembly for 2019 on March 23, 2020. The minutes of the meeting were announced to the public on our website and at PDP. According to the decision taken at the meeting:

Pursuant to a review of the Consolidated Financial Statements for the year 2019 prepared in accordance with the Turkish Financial Reporting Standards, it was resolved to propose to the General Assembly to distribute profit as follows from 1,033,622,000.00TL Consolidated Net Profit incurred between 01.01.2019 - 31.12.2019;

- Payment of Gross TL 708,641,380.27 dividend in cash (Gross %60, net %51) to the shareholders who are representing the TL 1,181,068,967.12 capital,
- To reserve the remaining amount as extraordinary reserves,
- It was resolved to propose the General Assembly to distribute the cash dividend, beginning from 1 April 2020.

Dividends derived from the Group's distributable earnings at 2019 have been distributed within April.

The Competition Board decided to conduct an examination for electricity distribution and electricity retail sales companies in Istanbul Anatolian Side, Ankara and Toroslar electricity distribution regions, whether the Article 6 of the Law on the Protection of the Competition was breached, in December 2016. Following the examination, the Competition Board decided to impose an administrative fine in the amount of TL 143,061,738.12 to İstanbul Anadolu Yakası Elektrik Dağıtım A.Ş., Enerjisa İstanbul Anadolu Yakası Elektrik Perakende Satış A.Ş., Enerjisa Başkent Elektrik Perakende Satış A.Ş. and Enerjisa Toroslar Elektrik Perakende Satış A.Ş. As per to the relevant penalty legislation, a 25% discount was applied to the relevant fine and the fine was reflected as a one-time expense in the amount of TL 107,296,303.59 under 2018 annual financial results, while the underlying net income was not affected.

A cancellation lawsuit was filed against the decision of the Competition Board by the relevant companies on April 5, 2019. The judgment process of the first degree court is still pending.

At the 2019 Ordinary General Assembly meeting held on March 23, 2020, the amendment in the Remuneration Policy for the Board of Directors and Executives of the Company has been accepted.

b) Information on the operational developments during the related fiscal period:

Operational earnings (EBITDA + Capex reimbursements) of Enerjisa Enerji A.Ş. have increased by TL 141 million (+13%) from TL 1,126 million at Q12019 to TL 1,267 million at Q12020.

This increase in operational earnings was mainly driven by the Distribution business unit, which as of end of Q12020 contributed 85% of operational earnings for Enerjisa Enerji. The increase in the earnings of the Distribution business unit are mainly due to:

- **Financial Income:** TL 41 million higher financial income mainly driven by higher Regulatory Asset Base, which grew from TL 8.4 billion at Q12019 to TL 9.3 billion at Q12020.
- **CAPEX Reimbursements:** Capex reimbursements increased by TL 56 million from TL 280 million at Q12019 to TL 336 million at Q12020 due to higher RAB.

The contribution of the Retail business unit in operational earnings increased in Q12020, driven mainly by an increase the free market segment gross profit increase by TL 92 million from TL 10 million to TL 102 million at Q12020.

Regulated segment sales decreased by 16% from 8.6 TWh at Q12019 to 7.2 TWh at Q12020 due to corporate customers subject to Last Resort Tariff (LRT) switching from regulated to free market. Liberalised segment sales increased by 162% from 0.7 TWh at Q12019 to 1.8 TWh at Q12020.

Enerjisa Enerji A.Ş **Underlying Net Income** increased by TL 55 million from TL 297 million at Q12019 to TL 352 million at Q12020. Below Operational earnings, the main effects were as follows:

- TL 25 million lower net loan interest expenses driven by lower weighted average loan financing cost.
- TL 47 million higher bond interest expense and TL 44 million higher deposit valuation expenses both due to higher CPI change (PY: -0,8% vs. A:+2,5%)
- TL 17 million lower other financial expenses due to lower refinancing fees.

The average cost of financing from loans has decreased from 17.8% at Q12019 to 14.9% at Q12020, whilst in the same period the average cost of bond financing increased from 1.5% to 14.8%.

Economic Net debt (including non-financial net debt, including lease liabilities and customer deposits) increased from TL 10.6 billion at Q12019to TL 11.0 billion at Q12020.

7- RISKS AND THE EVALUATION OF THE MANAGEMENT BODY

a) Risk Management Framework of Enerjisa

Enerjisa's Risk Management Framework aims to define all risks and opportunities, which may cause a deviation from financial, operational and strategic plans and enables to assess, classify and mitigate these risks through various methodologies. The ultimate goal of the framework is to provide transparency to management functions and influence decision making processes via regular reporting.

All risks and opportunities are identified through a detailed assessment process. For each risk and opportunity, best, base and worst cases are simulated with their probability of occurrence. For the risks that are not easy to quantify, impact and occurrence levels are defined based on other approaches and prioritised accordingly. These assessments form the basis of the Enerjisa Risks and Opportunities reporting, which is presented to top management as well as to the Enerjisa Early Risk Detection Committee.

b) Key Risks and Opportunities

Due to the nature of the electricity distribution and retail business, Enerjisa is exposed to various risks and opportunities throughout the value chain. Based on their sources, risks and opportunities are classified in five categories and monitored accordingly.

i. Regulatory Risks and Opportunities

The electricity distribution and retail businesses are regulated businesses under the supervision of EMRA and are governed by the Electricity Market Law and relevant secondary regulations. For regulated customers Enerjisa applies the National Tariff which is determined by EMRA on a quarterly basis. Among other components, the National Tariff is composed of a regulated distribution tariff and a regulated retail sales tariff. EMRA determines the components of the National Tariff for each tariff implementation period, and the 3rd tariff implementation period covers the period between 2016 and 2020. However, the final values of the Distribution Tariff and Retail Energy Sales Tariff, which are reflected to end-users' invoices, are determined by EMRA on a quarterly basis, in order to reflect changes in market costs to tariffs.

As the majority of Enerjisa revenue is generated from our electricity distribution operations and retail sales to regulated customers, which are both subject to regulated tariffs set by EMRA, any change on these tariff components and/or calculation methodologies mean a significant deviation from Enerjisa plans.

Additionally, the regulations issued by EMRA, among other matters, impose organizational and operational restrictions on, and requirements with respect to our electricity distribution and retail sales operations. These requirements and restrictions are audited by regulatory authorities (mainly by EMRA) and any non-compliance detected upon these audits may have an adverse effect on Enerjisa financial and operational plans.

Enerjisa engages in regular and constructive consultations with sector participants to monitor regulatory related risks and opportunities. Additionally, through transparent reports and structured projects, Enerjisa, as the market leader, actively seeks a rational fact-based discussion with all sector participants.

ii. Market Risks and Opportunities

Enerjisa is subject to financial market risks relating to interest rate fluctuations due to our financial borrowings as well as foreign exchange rate fluctuations due to Feed-in-Tariff regulation.

Enerjisa is also subject to commodity market risks related to OTC price and volume fluctuations due to our sourcing strategy for retail sales business and other commodity price fluctuations due to our raw material procurements (transaction are in local currency, but highly correlated with related commodity prices) for the Distribution business.

Enerjisa uses systematic approaches to forecast market parameters such as price, rates, demand etc. Existing and expected exposures are monitored regularly and through hedging operations the risk exposure is kept at an optimum level. Hedging strategies, their effectiveness and further plans are discussed regularly in the Finance Committee and Commodity Risk Committee.

iii. Credit Risks and Opportunities

Enerjisa retail companies are exposed to counterparty credit risk with respect to the collection of invoices for regulated and liberalized customers.

Enerjisa distribution companies are also exposed to counter-party credit risk in respect of their distribution system users, municipalities and provincial special administrations that are in our distribution regions and use the general illumination. However, as Distribution companies receive reimbursements for overdue receivables from EMRA within two years, credit risk for our Distribution business only has a cash flow rather than a revenue impact. Enerjisa is exposed to credit risk with respect to its transactions with financial counterparties (mainly loan providers).

Enerjisa manages credit risks by requiring security deposits from regulated customers and letters of guarantee or other form of securities from liberalised customers to secure present and future invoices. Timely invoicing, efficient receivable management and credit scoring of large customers enables Enerjisa to mitigate credit risk as much as possible.

For the mitigation of financial counterparty credit risks, apart from reporting and monitoring activities, Enerjisa is exclusively engaging with counterparties that have a rating of no more than 2 notches below the Turkish sovereign rating. Moreover, diversification of banks in the portfolio of financial hedging instruments as well as cash deposits is ensured.

iv. Liquidity Risk

Enerjisa is exposed to liquidity risk due to the ongoing funding needs which arise from Distribution network investments. While Enerjisa expects that these funding needs can be covered by external debt capital providers, market situations may arise in which conventional sources of liquidity are limited.

Enerjisa manages liquidity risk by actively seeking to extent average tenors of the loan portfolio as well as to develop alternative sources of debt capital (e.g. corporate bonds). Furthermore, Enerjisa regularly forecasts short and mid-term funding needs in order to anticipate liquidity needs in time to prepare and act accordingly.

v. Operational Risks

All processes throughout the value chain in Enerjisa are exposed to operational risks such as Information Technologies, Health and Safety, Environment and Reputation risks are the main categories that are identified and managed accordingly.

For all types of operational risks, relevant procedures and policies are structured and published in Enerjisa's quality systems. Committees are assigned to review all event occurrences and to monitor existing mitigation actions.

c) Enerjisa Risk Monitoring Procedure

All risks and opportunities are identified through a detailed assessment process. For each risk and opportunity, best, base and worst cases are simulated with their probability of occurrences. Correlations are considered during consolidation of risk and opportunity impacts. For the risks that are not easy to quantify, impact and occurrence levels are defined based on other approaches and prioritized accordingly. These assessments form the basis of the Enerjisa Risks and Opportunities reporting, which is presented to top management as well as to the Enerjisa Early Risk Detection Committee.

d) Enerjisa Early Risk Detection Committee

The Enerjisa Board delegates the monitoring of risks to the Early Risk Detection Committee. Members to the committee are selected board members (including two independent members) and the committee is chaired by an independent Board Member. Aside from receiving regular Risks and Opportunities reports, each meeting agenda includes an in-depth review of a prioritized topic. The Early Risk Detection Committee reports directly to the Enerjisa Board.

Early Risk Detection Committee is responsible to advise Board regarding risk and opportunity definitions which threat company's existence and strategies, relevant mitigation actions, early detections and precautions. Following Board review, agreed actions are monitored by the Enerjisa CFO and Early Risk Detection Committee.

The meetings of the Committee are organized at least four times (once every three months around quarter closings) per year. As of first quarter of 2020, the Early Risk Detection Committee had two physical meetings and one report circulations. Meeting and report circulation dates, members participation and in-depth review topics have been the following:

e) Enerjisa Corporate Governance Committee

Following the IPO in February 2018, the Corporate Governance Committee has been enacted at the General Assembly Meeting held on March 29th, 2018. Members of the committee are selected board members, as well as the Enerjisa CFO and committee is chaired by an independent Board Member.

The purpose of Corporate Governance Committee is to make suggestions to the Board of Directors of the Company in order:

- To ensure the compliance of the corporate governance principles of the Company with the Corporate Governance Principles as determined by the Board and other internationally accepted corporate governance principles and best practices,
- To make advices in order for implementation of such principles,
- To follow-up compliance of the Company with such principles.

This Committee also performs the governance related duties of the Nomination Committee and the Remuneration Committee within the Company.

The meetings of the Committee are organized at least four times (once every three months around quarter closings) per year. As of first quarter of 2020, the Corporate Governance Committee had one physical meetings. Meeting and report circulation dates and in-depth review topics have been the following:
